Candlemakers since 1862

The story of Cerabella began in the late nineteenth century when **Francesca Abella**, a woman ahead of her time, opened a small candle factory in Barcelona. More than 150 years later, Cerabella, which continues to be run by the same family and is based in Barcelona and Miami, has reinvented the profession by transforming its expertise into inimitable value.

Handmade in Barcelona

Every candle tells the story of the hands that made it. These unique works of art are made with the creative, open and Mediterranean nature of the city where they were born.

Every candle is the result of the dedication of a master craftsman who, with passion and care, makes this unique profession a reality. Like the flame of a candle, this artisanal and traditional craft withstands the whirlwind of time.

Design

Cerabella's candle designs are the result of hand-drawn inspiration from beginning to end, featuring natural materials adorned with scents that have been carefully selected by master perfumers.

Every piece reflects the personality of Cerabella and its unique character that sets trends and standards for decorative candles.

Jordi Labanda, Sybilla, Michelle Oka Doner, Miró and Muma Soler are some of the artists who have teamed up with Cerabella to create candles that are now part of the collection.

Personalization

Thanks to its production facility and in-depth knowledge of candle making, Cerabella is able to offer personalised candles that range from large quantities to unique wax sculptures.

The wide range of services make it possible to carry out all types of wax projects at the highest level.

NUMBERS:TONKA&BALSAM

With the beginning of autumn, a new fragrance is added, this time the duo Tonka & Balsam (number 22), whose chord begins with refreshing and sweet berry and peach notes that harmonise perfectly with the balsamic, spicy, sweet and peppery aroma of myrrh, which then fuses with the background of patchouli and tonka. The essence of tonka beans is the key to this fragrance, which makes this aromatic accord unforgettable. Tonka & Balsam is a refined and elegant combination in the form of a candle in a classic glass container, this time in basil green.

In addition, Cerabella integrates the small candle and the room spray for all fragrances of this collection - a must-have of scented candles. Thanks to this new and practical spray format, anyone who is enthusiastic about the "number" fragrances can quickly and conveniently decorate all rooms in the house with their distinctive fragrances.

XXL

NUMBERS:ANNIVERSARY EDITION

For the enthusiasts and followers of Numbers candles, and scented candles in general, this season we are celebrating because Cerabella wanted to reward us with a compilation of its aromas to pay tribute to this collection. A family of candles that brings together the two hundred years of expertise of the craft profession of Cerabella: that of its perfumers, who harmoniously create the duotone aromatic chords that form this collection, and that of its master candlemakers who, using their hands, capture all of this essence in the wax, to transform it into a candle.

In a limited edition, Cerabella is offering us two large size models in black glass and with a velvety feel:

A journey through 10 highly-esteemed Numbers fragrances such as Earl Grey & Bergamote, Amber & Olibanum, Jasmin & Magnolia, Orchid & Patchouli, classic scents from the collection such as Lime & Peppermint, Gardenia & Coriander and Violet & Caramel, irresistible aromatic chords such as Rose & Cardamom, Fig & Wood, the refreshing Mango & Melon and the latest addition to the collection, Tonka & Balsam.

CANDLE CARE KIT

A good candle is like a jewel, a little ephemeral work of art that deserves to be looked after. Cerabella is offering us a case for looking after candles formed by these four accessories and their user guide:

Candle wick trimmer: It is a tool in the shape of a pair of scissors with a receptacle. It is used to feed the flame by eliminating hot ash and carbon balls from the wick, which are sometimes caused by the burning of foreign objects, such as dust or some components of perfumes. The receptacle is used to prevent the part you eliminate from falling into the melted wax.

Wick straightener: It is a tool that makes it possible to put out the flame of a candle by sinking the wick into the melted wax and then straightening it out just afterwards. It is used for candles in a container, and provides quick and smokeless extinguishing, while also soaking the wick in wax to enable quicker and more effective subsequent lighting.

Snuffer: It is an accessory that is used to put out candelabra candles, avoiding the wax splashes that occur when you put the candle out by blowing.

Tray for candle care: The candle that is going to be treated and the tools to be used are placed on the tray, thus preventing the accessories used from being placed on another surface that could get stained with wax. The four tools are made from black metal with a velvety feel, they are designed to effectively look after the candle and are organised in an elegant case that makes it easier to keep all the accessories organised. A magnificent gift for

ATMOSPHÈRE

Atmosphère is a candle inspired by old oil lamps. A sculptural piece that when lit, projects a beautiful and subdued light due to the effect of the lampshade of wax.

The Atmosphère candle consists of three pieces: the lampshade of white wax, the inner candle, with replacements, and the base, made from hand-modelled mortar. A set that produces an original wax lamp capable of creating a magical atmosphere with its snow-white light.

The candlestick from the same collection is presented next to the candle. This holder for candelabra candles is made from the same hand-modelled recycled mortar and the top part, which holds the candle, is made from aged iron.

Peça única feta a mão com fibras recuperadas.

Pieza única hecha a mano con fibras recuperadas.

Pièce unique fabriquée à la main avec des fibres récupérées.

Unique and handmade product made out of re-utilized fibers.

Einzigartiges und handgefertigtes Produkt aus wieder verwerteten Fasern.

PRANA

We live in a routine that has become a race to do everything, a sprint against the clock that prevents us from enjoying our daily lives.

The Prana collection emerges out of the need to stop and relax. A collection of scented candles and reed diffusers that aims to help us to bring our fast pace of life to a stop. The ritual of taking a break by lighting a candle, and thus switching off and taking care of our inner self. An oasis of peace in the middle of the storm of routine.

The Prana collection by Cerabella is formed by four candles in glass containers and their reed diffusers, and although each candle has a different scent, they all share the calm and serenity they convey:

Vital Breath has a fragrance with aqueous and citric top notes, with a body of muguet and a warm base of amber, that will restore your balance.

Spiritual Amity is an explosion of citric notes accompanied by a combination of lotus flower, moss and a marine chord, that will help you achieve harmony.

Renaissance has an aroma with a vibrant citric high note, an aqueous muguet body and a woody base, the ideal cocktail to renew your energy.

Life Balance is the perfect combination of lotus flower with jasmin, which along with the warmth of the sandalwood and vanilla, will pave the way towards inner peace.

100% recycled product

CANDLE MAKER KIT

And if you were told that you can create your own Cerabella candle at home?

That is the case with the new Candle Maker Kit by Cerabella. Using it, with ingenuity and a few simple instructions, you can feel like a master candlemaker.

To do so, you can choose between 4 different options depending on the scent you prefer: fruity Red Berries, oriental Cinnamon, the sweet touch of Vanilla or the freshness of Lavender.

Each kit comes with a metal tin to make your candle in, 2 bars of scented wax, wicks and a label to personalise the lid of the container however you wish to. A 100% handcraft experience. Also, there are extra wicks so you can continue to make new candles with the leftovers you have around the house. A great idea right?
